

ELEMENTARY SCHOOL:

A place where all belong

Creating an individualized and nurturing academic environment for students with emotional support needs.

INDIVIDUALIZED. NURTURING. ACADEMIC.

- On-site mental health services for ease of care coordination & support.
- Small class sizes & low student:teacher ratio.
- With a holistic approach to learning, we are able to accommodate unique needs in combination with emotional support needs.
- Focus on successful behavioral and emotional supports along with continued academic growth, offering students support in all aspects of development.

When a child is struggling in their school district, it is crucial to provide them with holistic care that addresses their needs both academically and emotionally.

Child Guidance offers a licensed, private Elementary School for children in grades K-8 in Delaware County. Our school is a structured academic environment, much like mainstream classrooms, and teaches an academic curriculum but with a strong emphasis on social, emotional, and behavioral development. As part of a mental health organization, we are able to collaborate with families to help support and coordinate behavioral health services when needed.

The goal for every child in our school is to learn the skills to return successfully to their own public school district.

We work closely with our students' home school districts throughout their time at our school. We collaborate with parents and community supports to ensure children are set up with the tools and supports they need to succeed when they return to the public school system.

HOW TO GET STARTED:

School districts primarily refer students to our school. Enrollment is based on recommendations in a child's

Individual Education Plan. If you have a child who sounds like a good fit, contact us.
